Unbulcking

Bitcoin and Shiba Inu, the one thing these projects have in common, is an 8 billion %
increase in value, meaning if you had invested just one (1) dollar into one of these projects
at a key moment within their first year, you could effectively be a multi-millionaire today.

The monumental gains of crypto, however, also popularizes crypto, which is as exciting as it
is dangerous.

At the time of writing this, the freshest example would be the Squid Game Token, which
managed to rug pull over $3 million, a number nowhere near the DeFi market which have
been responsible for rug pulling $113 million by July 2021
This is just the beginning though, as only 11% of the American population have invested in
crypto.

Although we're sure to see added security and an increase of investors in the crypto market,
scammers will continually find increasingly complex methods to trick you into handing over
your investments, hack your wallet, or to rug pull.
This is why Michael Jackson Coin aims to be as honest with investors as possible, to make sure that you
feel safe with your investment in an exponentially unsafe world. This is also reflected in our
tokenomics and max wallet loft.

While Michael Jackson Coin can't promise you to cure your depression, we can promise
you our utmost dedication to make a unique, transparent and honest long-term investment
opportunity, possibly just about crazy enough to replicate the gains of Bitcoin and Shiba Inu.

How we wipe ?

Our overall values and ideals can be summarized in one word, HONESTY.

Ideally, you'd want to find sugarcoated toilet-thunk fabrications of elaborate use cases for
your Michael Jackson Coin in this whitepaper.

We'd much rather be realistic and state that we will
become the one and only absolute Michael Jackson Coin to make it into the general public's view.

Michael Jackson Coin will be the layman's finger guns to the stock market and the top dogs in crypto.

What is Michael Jackson Coin?
Michael Jackson Coin is an honest and confident attempt at a solution heavily influenced and driven by
the community. The only way Michael Jackson Coin will succeed and peak the charts in the most ironic
way possible, is if everyone is on the same page on how we get to this stage.

And, as stated by everyone's beloved businessman:
"The most ironic outcome is often the most likely"
- Elon Musk

This is Michael Jackson Coins bread and butter section.

Michael Jackson Coin has been designed to encourage investors to buy and hold for longer periods of time.

Michael Jackson Coin has a fixed total supply of 1,000,000,000 and a humbly small development wallet

where 1% of all buy/sell transactions are sent to, to ensure the success of Michael Jackson Coin, or for

charity donations. The development wallet is paid in BNB.

Development wallet:
0xA024e2fB2aBe0239aFB03e34370933C421a1F8cA

Any wallet can hold 4.20% of the total Michael Jackson Coin supply at any given time.

Questions & Answers
Tokenomics

- Goal of the token?
Collectively put our minds together and build a driven rocket.

- When will it be on an exchange?
Exchanges can make or break a coin. The cheapest options will only lead to disappointing performance.
Therefore, we are saving for a decent exchange listing.

- Why have you been developing this since December 2021?
I didn't want to create something that would just be flash in the pan, I wanted to try my best to create
something that'll last.

- Which charity would you like to donate to?
We have a very humbly small development wallet but If we see a community member in need of aid we'll
do what we can to set something up for them.

- Why these tokenomics

Tokenomics Buy
* 1,000,000,000 ← bit rhymes with MJC and I wanted to give people a sense of connection to their MJC.
* 0% Transfer ← a zero transaction fee makes it easy to share your MJC with others.
* 4% Auto-Liquidity ← more liquidity means the coin is firmer and less likely to the bed
* 1% Development ← pumped straight back into the coin in the form of acquiring listing requirements.

Tokenomics Sell
* 1,000,000,000 ← bit rhymes with MJC and and I wanted to give people a sense of connection to their MJC.
* 0% Transfer ← a zero transaction fee makes it easy to share your MJC with others.
* 6% Auto-Liquidity ← more liquidity means the coin is firmer and less likely to the bed
* 1% Development ← pumped straight back into the coin in the form of acquiring listing requirements.

Smart Contract Quick Check

Project details:

Project name:	**MichaelJacksonCoin**

04 Celebrity endorsement campaign

05 Roadmap v2

Pipe Journey

To keep Michael Jackson Coin true to its values. I have revised why Michael Jackson Coin was made in the first place,
and therefore have revised the coin and tokenomics multiple times to reflect this properly.

We're currently at a state where everything is in order, and we're ready for our successful launch.

A bi-product of this has been to fail launches and forfeit the capital I invested to launch,
while making sure to keep everyone in the loop so as not to lose their investment.

The internal seed-sale was a private sale for invested community members who had helped us along the journey with no pay.

Vision

Low-budgeting and only paying for necessities will help by keeping us grounded and allows us to build a strong foundation based on trust and faith. This Whitepaper is a reminder for everyone to keep this in mind as our community and project grows, since if our vision is lost, so is our trustworthiness, integrity, and most importantly, Michael Jackson Coin.

Job offers are prioritized to reflect the statement above:
We strive for the success of this project and are mainly aiming for a community-driven token in the long run, where every investor's voice is taken into consideration to ensure the likelihood of everyone reaching – the ultimate gain.

Launch

I want to make sure holders of Michael Jackson Coin stay as decentralized as possible. By keeping Michael Jackson Coins launch market capitalization under a million, and through our tokenomics, we
ensure that not one person or a handful of people hold the majority of the supply.

The Michael Jackson Coin launch will start on PancakeSwap. Investors can redeem their tokens by navigating to the page,
connect their wallet and pressing claim.

All investors can navigate to the PancakeSwap page, connect their wallet and exchange token to collect their investment.
Shortly after the listing ends, Michael Jackson Coin will be available for purchas on DeFi swaps that
support Pancakeswaps V2 liquidity router.

Team overview

Michael Jackson Coin is founded and lead solely by Michael Jackson Coins amazingly driven community members and me, Mickaël :

I'm a 27 year old washed up degenerate homosapien, that regularly contemplates if this society we have created is worth being in or not, yet still have a tiny fire inside me that burns to change that mindset. It seems studying and working for a degree and Michael Jackson Coining is the best way for me to ignite this way.

Disclamer

This Whitepaper does not serve as financial advice. While we would love to see everyone
aboard the MJC™, you are investing in a heavily volatile market where no one can
predict the outcome of anything.
